Brief on the National Planning Office of Hungary

25X1

The National Planning Office was originally created in 1947 to supervise the preparation and execution of the Three Year Plan. It has continued to exist since that time and has supervised the subsequent five year plans. Originally, the Office was assigned responsibility to work out details of the plan, prepare measures to implement it, inform and instruct the ministries and other organs as to plan fulfillment, and make recommendations to the Economic Council, which operated as the primary policy agency. The latter agency no longer exists, apparently having been abolished in 1956.
